

The following items are recommendations for your upcoming CAMARGUE photo workshop. Please note that most items are not necessary for you to participate in the workshop, but we encourage you to bring them if you own them. If you do not own items on this list there is no need to purchase them. We will be photographing horses, birds, landscapes and villages.

### **EQUIPMENT**

Camera body  
Back-up camera body  
Tripod legs and head

### **LENSES**

Wide-angle lens (16-35mm range)  
Mid-range lens (24-105mm range)  
Telephoto lens (70-200mm range)  
Telephoto lens (100-400mm range)

### **FILTERS**

Graduated neutral density  
Neutral density  
Polarizer

### **MISC EQUIPMENT**

Cable release  
Lens cleaning cloths  
Extra batteries and battery charger

### **TECHNOLOGY**

\*Laptop and power supply  
Card reader with cables  
Portable back-up drive  
European plug adapters

### **LENSES FOR THE HORSES**

Last year, I brought and used a 300mm prime lens for the horses. I found the lens that I used the most was my wide angle. This year, I will bring a 100-400mm lens. The horses begin running from a distance, but they run fast. Having the ability to zoom will help you to get more photographs. We will position our tripods and cameras with larger telephoto lenses to capture the horses running. I wear a 2<sup>nd</sup> camera body with a lens strap over my shoulder that has a wide angle lens attached. This way I can capture images when the horses get close.

**I always recommend carrying a back-up camera in the field.** I have seen even the newest cameras fail from time to time. If you do not have a second camera body, see if you can borrow one from a friend, or consider renting one for the workshop at either [lensrentals.com](http://lensrentals.com) or [borrowlenses.com](http://borrowlenses.com)

**It is very important that you bring extra batteries. If you are using a mirrorless camera, your battery life is even shorter.** Please consider purchasing or borrowing extra batteries.

Europe use different plugs for electronics. Please bring a converter and adapters. These can be purchased at travel sections in most big stores.

\*It is not necessary for you to carry a laptop to the workshop. You will want a method of backing up your images. If your camera holds two memory cards, you can back-up using this method. If you carry a portable external hard drive, please bring the cord that connects your camera to the drive for back-up.
